

CHILDREN'S RESEARCH – WORLD TRADE CENTER HEALTH REGISTRY

Scientific Outputs that focus or include enrollees
under 18 years of age

Scientific Outputs as of June 30, 2019

THE NEW YORK CITY DEPARTMENT
of HEALTH and MENTAL HYGIENE

WORLD TRADE CENTER HEALTH REGISTRY
New York City Department of Health and Mental Hygiene
125 Worth St, 10th Floor, New York, NY 10013

CHILDREN'S RESEARCH: WORLD TRADE CENTER HEALTH REGISTRY

This study is currently supported by Cooperative Agreement 5U50/OH009739 from the National Institute for Occupational Safety and Health (NIOSH) of the U.S. Centers for Disease Control and Prevention (CDC) and the New York City Department of Health and Mental Hygiene (NYC DOHMH).

Previous support was provided by Cooperative Agreement 2U50/OH009739 from NIOSH and Cooperative Agreement U50/ATU272750 from the Agency for Toxic Substances and Disease Registry (ATSDR), which included support from the National Center for Environmental Health (NCEH), and the New York City Department of Health and Mental Hygiene (NYC DOHMH).

CHILDREN'S RESEARCH

SCIENTIFIC OUTPUTS BY TYPE

The World Trade Center Health Registry's completed scientific outputs include publications in peer-reviewed journals, technical reports, WTC-related clinical guidelines, scientific presentations, external research projects and publications, public use data tools, and master and doctoral theses based on Registry data.

Among Registry enrollees, 3,250 were under age 18 years on 9/11; 2,624 were under age 18 at the time of Wave 1 survey enrollment into the Registry in 2003-04; and 43 enrollees were under age 18 on June 30, 2019, the date of this report. By 9/11/2019, all of the enrollees who were children at the time of enrollment will have aged into adulthood.

Most of the original 3,250 enrollees who were children on 9/11 have now aged into adulthood. They are included in our scientific outputs as young adults.

In this report Registry scientific outputs are organized as follows:

1. **Research Focused on Children:** These scientific outputs are focused on persons who were under 18 years of age at the time of the most recent data collected and analyzed in the reported research.
2. **Research Including Children:** These scientific outputs included persons who were under 18 years of age at the time of the most recent data collected and analyzed in the reported research.

Scientific outputs that are solely methodological (e.g., describe how to create a Registry or focus on survey methods) are not included in this report on Children's Research.

Visit <http://www1.nyc.gov/site/911health/index.page> for access to Registry scientific publications, technical reports, WTC-related clinical guidelines, annual reports and other materials.

Note: the following indicators are used to note collaborative scientific outputs, NIOSH-funded external research projects, and other external research projects.

- a** Includes co-author(s) from the WTC Health Program
- b** Includes at least one non-DOHMH co-author (e.g., a collaborator, an approved external researcher, a consultant). [*A DOHMH author is defined as current or former DOHMH staff, including students and interns but excluding medical residents.*]
- c** External research project funded by NIOSH (including the WTC Health Program)
- d** External research project – Registry provided de-identified and/or summary data
- r** External research project – Registry-facilitated recruitment
